

TRAINING

Information and discussion session on the Spent Fuel State-of- Knowledge document

Access to the recording:

<https://euradschool.eu/information-session-and-discussion-on-the-spent-fuel-state-of-knowledge-document/>

During this online lecture, Kastriot Spahiu, the author of the Spent Fuel State-of-Knowledge (SoK) document, will discuss the SoK document, which focusses on the release of radionuclides from the spent fuel during disposal. He will focus on the highlights from the document and will dive deeper into issues related to spent fuel which are not mentioned in detail in the SoK document.

The second part of this lecture is a discussion session which will be based on requests from the audience. Additionally, there is a room for spontaneous discussions.

This training session is open to all, especially those who have an interest in EURAD SoK documents and spent nuclear fuel.

Learning outcomes

Upon completion of this session, participants should be able to:

- List the most important aspect of spent fuel research
- Discuss open issues related to spent fuel
