

## “Interactions with Civil Society” workshop n°6

10-11 April 2024

In person: **Celica hotel, Metelkova 8, 1000 Ljubljana, Slovenia**  
Or online (Zoom meeting): <https://us02web.zoom.us/j/5839111387>

### Agenda

This Workshop is organized by NTW in the frame of Interaction with Civil Society (ICS) activities of the EURAD joint programme for research on radioactive waste management. This ICS Workshop was not planned initially and therefore offers the possibility for co-creative methods to frame a shared way forwards on key issues.

This will be the last EURAD ICS workshop (ICS workshop no. 6), built on shared outcomes and evaluations from the 5 years of ICS activities in EURAD. It will give the opportunity to focus on the results dissemination of the cooperative work done in the frame of the EURAD ICS activities and to plan some concrete steps to build up on outcomes in the future.

**Wednesday, 10 April 2024**

**13:30:** Welcoming and introduction - Nadja Železnik, NTW/EIMV

**14:00:** Short update and synthesis on outcomes and key issues from civil society involvement.

- PMO: ICS workshops & evaluation (5mn)
- UMAN: deliverables & workshops (5mn)
- ROUTES: deliverables & workshops (5mn)
- MODATS: deliverables & workshops (5mn)
- Other interactions (5mn)

**14:30:** Discussion on how to integrate outcomes and key issues in the EURAD annual event.

*15:15: Break*

**15:30:** Intergenerational stewardship culture – Niels Henrik-Hooge, NTW & Gabriele Mraz, NTW.

Using the portfolio made from the drawings realized during the previous ICS workshop, a dialogue will be animated around the topic of the intergenerational stewardship culture concept.

In practice we will ask ourselves about topics and emotions emerging from it, consider how to integrate them to a reflexion on rolling stewardship, and evaluate how we could address them in future work inside and outside EURAD.

*17:00: Break*

**17:15:** Evaluation of a visualization tool for civil society interactions – Colin Wales, NTW.

This idea of a pedagogical tool to help visualising DGR complexity emerged from the discussion based on a drawing realised by Colin Wales, NTW, that encapsulated results from a previous discussion on Geosafe results during the ICS workshop no.5.

**18:00:** End of the session

### **Social event**

**18:30:** Cultural visit of Ljubljana

**20:00:** Social dinner

**Thursday, 11 April 2024**

**09:00:** Introduction

**09:15:** Updating our views on shared culture for safety and security – Gabriele Mraz, NTW.

From the Sitex II study, on views of civil society and technical support organisations actors for a safety culture, presented during the ICS workshop no 5, some questions will be raised to see if some views could be updated or developed considering the new challenges up to date (“SMR”, extensive NPP lifetime extension plans, final repositories’ developments...).

**10:00:** *Break*

**10:15:** Dissemination & triple wing model – Julien Dewoghélaëre, NTW.

It was previously proposed to develop a third wing to the current double wing model, involving local communities and other actors who have had no or little experience with civil society involvement in RWM. Concrete way to implement such a triple wing model and other ways of improving dissemination of ICS activities could be here discussed.

**11:45:** Evaluation and charter for fruitful interactions - Alexis Geisler-Roblin, NTW.

As criteria for establishing fruitful interactions between researchers and members of civil society have been developed, they could be used to collectively assess the event. Furthermore, a charter for fruitful interactions could be developed to better evaluate the interaction with civil society in the frame of Radioactive Waste Management research.

**12:15:** Conclusion - Nadja Železnik, NTW/EIMV

**12:30:** End of the session

**Nuclear facilities visit.**

**12:45:** Lunch

**13:45:** Nuclear facilities visit: Central Interim Storage Facility (ARAO) and Information Center (JSI).

**17:00:** End of the visit
