

OPEN DISCUSSION SUDOKU-CLIMATE JOINT SESSION

Topical session 4

Annual Event n1 Sept 2025 Bologna

Co-funded by the European Union under Grant Agreement n° 101166718

Under evolving climate conditions, which failure scenarios do you consider most critical for engineered barriers in near-surface facilities?

Which recommendations would you prioritize to guide optimization of the facility design and research to strengthen the robustness of near-surface repositories in a changing climate?

What approaches are most appropriate for addressing uncertainty in climate projections when evaluating engineered barrier performance?

RE_Group 1		
Koen	Beerten	SCK CEN
Josef	Brinek	UJV REZ, a.s.
Nuria	Marcos-Perea	Mitta Engineering
Chiara	Telloli	ENEA
Margit	Fabian	HUN-REN
Francesco	Freddi	University of
Isabel	Paiva	IST-ID
Crina	Bucur	RATEN ICN
Maia	Vercelli	Amphos21
joelle	elbez	EUROFUSION

Simon	Morgan	Office for Nuc.
Nadia	Cipriani	ISIN
DEWOGHELAERE	Julien	NTW

The **30-minute** session will be organized as follows:

25 minutes to discuss the answers among groups

5 minutes to prepare the summary to be shared during **the restitution**
